Index to
SURVEYING AND MAPPING

Volumes I—V • 1941—1945

Editor's Foreword

This Index includes all the principal articles—as well as the shorter items having reference value—that have appeared in the BULLETIN and in SURVEYING AND MAPPING beginning with the June 1941 Report on the First Meeting of the Congress. For the "Principal Articles" classification a combined subject and author index is used—each article being listed under subject and author—while in the other classifications only a subject index is used. The "Miscellaneous Items" classification includes surveying and mapping news items, "fillers," poems, quotations, etc.

The references in all cases are to the volume, number, and page of each issue. The corresponding dates of the issues can be obtained from the following compilation, which is a complete list of issues published to date:

VOLUME I—1941
